

EMK3 Connect! for Gas Marketing

Automate Information Distribution for Operators to Partners

The **Connect! for Gas Marketing** module provides an operator with a secure website to send information to their gas partners. This automates the distribution of volumes, statements and reports improving data quality and timelines. It is highly configurable down to individual partners.

EMK3 Connect is an add-on module for EMK3 Senergy that creates a highly secure website designed to enhance business collaboration with external stakeholders. It runs on a Microsoft platform and is built using modern web technology.

Key Features

- **Modern Web Technology:** The Connect application runs on a Microsoft Server platform and is accessible with a standard web browser. It is build using the latest technologies. It is designed to be simple to navigate and easy to learn.
- **Secure Sign-in:** Partners log into Connect using 3-part authentication for added security. The log in requires an additional "Company Code" credential beyond the standard user id and password.
- **Post Announcements:** The operator can post both public and private announcements. Public announcements are viewable by everyone, for example contact information. Private messages are viewable only by authenticated partners, for example scheduled maintenance and emergency events.
- **Post Volumes, Statements and Reports:** The operator can post production data, FOM nominations, statements and reports for partners to download. Most reports can be downloaded into Excel for partners to easily interface with other back-office systems.
- **Selective Deployment:** Choose to Connect-enable all or individual partners
- **Configurable Access Level:** Choose which Connect features to enable per partner, including read-only versus full-access. Also, instantly go from enabled to disabled in case of suspicious activity.
- **Full Audit Log:** All Connect activity is recorded in an extensive audit log. This includes activities like log-in, log-off, download reports, and more.
